## How do I log out of Google Classroom?

If you are using your own device, this may not be something you need to do. However, if you share this device with a sibling or family member who needs to access any google account including Google Classroom or Gmail then you will need to log out to allow them to log in!

Navigate back to either 'Stream', 'Classwork', or 'People'. You may need to close the tab with your work using the 'x' on the right.

Click on the coloured button on the top right which has the first letter of your first name on it. I like to call it the skittle as it looks like a skittle sweet!

The skittle will allow you to 'Sign out' or 'Add another account'. Both of these will allow another user to log in.
