### **Maths**

Addition and subtraction sums to 10 and 20.

Practise a set of number bonds (pairs of numbers that make 10) try testing daily – do the children get quicker / get more correct? Use hands, fingers, toes. Find numbers around the house. Check out <https://www.monstermaths.co.uk/> this is similar to the spelling activities and also has an app. Maths is all around and easy to talk about – what time do you get up? How many pieces of toast for breakfast? Who is the tallest / shortest in the family?

We have been learning about measure in class too. Can you measure household items using your hands, ruler, tape measure, toy bricks? Try cooking and making and measure ingredients carefully. We would love to see some of your delicious efforts on Google Calendar. Don't forget to practise writing numbers too – can your child write to ten or twenty independently and form each number correctly?

## YEAR 1 HOME LEARNING

Dear Parents,

Here is an overview of tasks your child needs to be completing at home over the forthcoming weeks. We are committed to ensuring that your child is still learning as much as possible and endeavour to do our absolute best to keep this happening.

Please see the attached recommended daily work schedule to help you plan your day.

We will be in communication with you via Google Classroom and email as much as possible during this time. We have many ideas for websites and apps that can support your child too. We will let you know through Google Classroom updates.

Take care and keep safe.

Warmest regards,  
Mrs Brinkworth and Miss Beadle

### **History/Geography**

We have been learning about pirates – find out about famous pirates. Did pirates come to Jersey? Make treasure maps and design pirate equipment. Talk about the parish you live in can the children recognise landmarks? Do they know of other parishes they visit? What makes Jersey so special?

### **Science**

Look after your sunflower. Draw pictures of the changes or take photos for Google Classroom. Talk about the fruit and vegetables the children eat – where do they come from? What is their favourite? How do they look? Feel? Notice changes in the weather and talk about which season it is.

### **Reading**

This is a great opportunity to read some good books that you haven't read in a while. Can you change the ending? Add a character? Change the setting? Tell verbal stories and make up your own – you can even act them out! Encourage your child to read initial sounds, spot sounds in words and labels on packages at home. The children will be bringing home some books at their level and one to share with adults.

### **Writing**

Try the pictures and activities at <https://www.onceuponapicture.co.uk/> and try out the activities for pictures that grab your attention. You can take photos of the children's work and share it on Google Classroom – let your imagination run wild! We'd love to see some. Check out words all around you – you'll be surprised how many the children can read just in the kitchen cupboard! Practise writing capital letters and lower case for each letter of the alphabet. Once again we will update ideas on Google Classroom.

### **Spelling, Punctuation and Grammar (SPAG)**

The website <https://www.teachyourmonstertoread.com/> has a variety of activities where the children have to sound out letters to make each word. There is also an app for those of you on iPads or phones. Play games – can you spell a word for every letter of the alphabet? Think of animals, fruit and vegetables or even sweets! How many words beginning with the same sound can you write? Try to get more each day!
